

AE Series Flat Plate Solar Panels

MADE IN USA

Thermaflo Engineering “AE Flat Plate” Panels are designed to provide years of solar heated hot water for your industrial or commercial installations using the proven “Thermafins” flat plate technology. Combined with Thermaflo’s 20 years of hot water system experience you can harness the suns energy and start saving energy today.

During the past 30 years solar energy has been somewhat of a myth to most users seeking to utilize the suns energy to heat hot water. Our goal is to destroy the myths, and make saving energy with solar technology simple with Thermaflo complete package systems designed to fits your needs.

Ask yourself these questions, and if the answer is yes to any of these, we can help you with a simple and reliable complete package system!

- **Do you use natural gas, electricity, or steam to heat hot water?**
- **Have you experienced an increase in your natural gas bill in the past few years?**
- **Does your business use natural gas, electricity or steam to heat buildings in the winter?**
- **Are you an institution or industrial facility that uses natural gas or steam to heat air, hot water, or a process?**
- **Are you confused about exactly what solar heating really is?**
- **Do you feel that solar energy is not a viable energy source for you?**
- **Do you think solar panels are an eye sore and will ruin the looks of your facility or home?**
